

Vacation work:
Junior Software Developer

www.techairos.com

Techairos Consulting is a small IT company that specialises in providing solutions where several technologies are integrated together.

We are often able to provide paid vacation work to Engineering, Informatics or Computer Science students.

Vacation-work dates can be negotiated, but you must be available for at least 2 weeks.

Job description

You will assist on a variety of projects, depending on your skills and experience. Possible tasks may include:

- **Software development** (various languages, various applications)
- **Information systems design** and integration, e.g.:
 - Gathering data on mobile devices
 - Feeding into a central database
 - Aggregating GPS-track data
 - Live information feeds/streams
- **Mobile app development** – typically Cordova + Ionic (Angular 2)
- Developing and testing **mobile surveys** using OpenDataKit or CommCare
- Setup and management of **Ubuntu** servers
- Customisation / improvement of **open-source software** projects, including some **Android** development
- Database setup, integration and management
